About me

A tech enthusiast with a strong passion for web development and problem-solving. Specialize in the
MERN stack (MongoDB, Express.js, React.js, Node.js) and love building dynamic, user-friendly, and scalable applications.

Skills

C | C++ | Python | HTML | CSS | Tailwind CSS | Javascript |React Js | MongoDB | Express.js | Node.js

Projects

Project 1 | Smash the Hunger – Partnership Webpage

Role: Front-end Developer | Duration: Oct 2024 – Dec 2024 | Team Size: 3

Tech: HTML, CSS, JavaScript

- Designed & developed a responsive partnership webpage for a social initiative that fights hunger and promotes food security.
- Crafted a clean, user-friendly layout to attract potential partners.
- Ensured an appealing design for clear communication of the initiative's goals.
- Added basic JavaScript interactivity to boost user experience.

Project 2 | Personal Portfolio Website

Role: Solo Developer | Duration: Sep 2024 – Nov 2024

Tech: HTML, CSS, JavaScript

- Built a dynamic portfolio site to showcase projects, skills, and achievements.
- Developed a responsive, visually engaging design for personal/professional info.
- Implemented JavaScript-based interactive elements for higher engagement.
- Ensured cross-browser compatibility and performance optimization.

Extracurricular Activities

- KIET Innovation Centre (Design Rush 2.0) (Duration: 6 Days October 2024)
